

ChartPlotterWEB – Boat Communicator

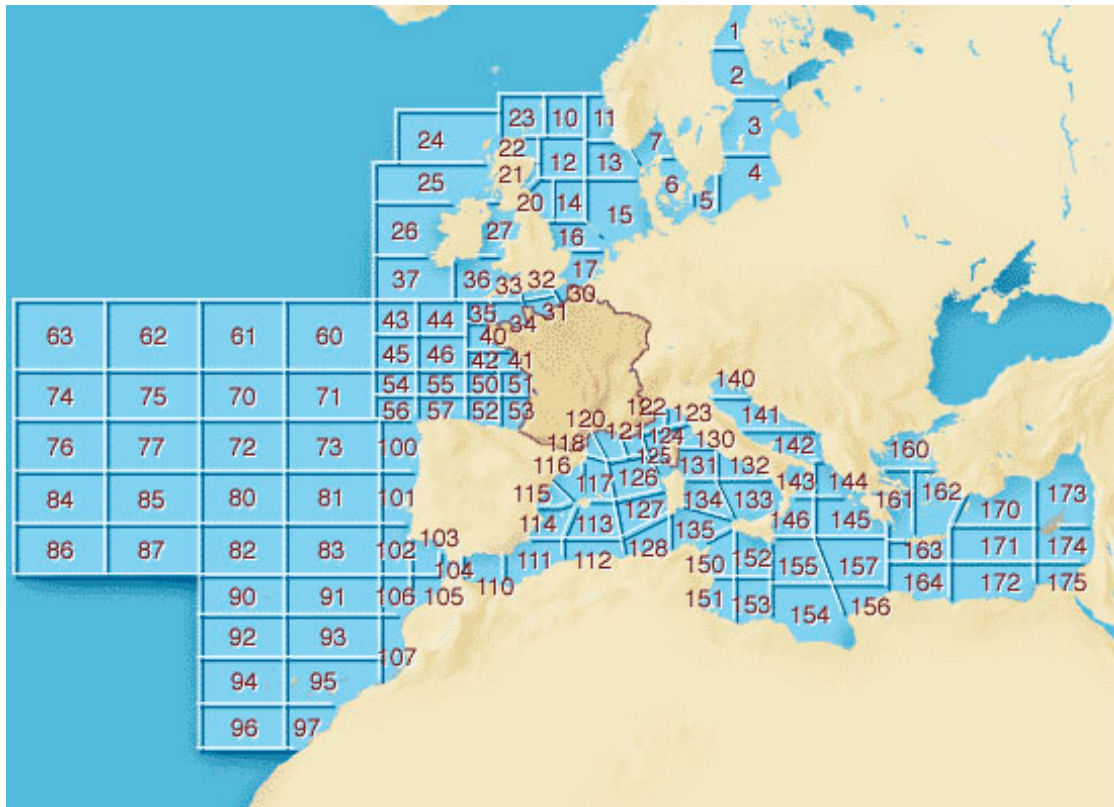

The first ChartPlotter with on time METEO forecasts!

A simple subscription with **METEOCONSULT SA** company (www.meteoconsult.fr), allows your ChartPlotter to ask for detailed Meteorological forecasts :

- in a single zone or in multiple zones shown in the figure
- along the active track

up to tree days every required elapsed time.

Upon the receipt of the forecasts, a nice icon will appear on the chart, placed in the geographical position you ask for. The forecasts can be seen in a popup window opening if the cursor moves on the icon itself.

The forecasts are provided for 6 hours intervals (00 – 06, 06 – 12, 12 – 18, 18 – 24) for each required day and are updated two times in a day, at least. The forecasts along the active track, maintained in the ChartPlotter cache, are refreshed automatically, if required.

The textual forecast information, shown in the proper window, includes:

• WIND (direction, force, gusts)	• ATMOSPHERIC PRESSURE
• SEA STATUS	• SKY STATUS
• SWELL (direction, height, type)	• PRECIPITATION
• VISIBILITY	• TEMPERATURE (air)
• FORECAST RELIABILITY	• COMMENT (on meteo state)
